## 2017 Capital Bond Program Preston Hollow Channel, Phases 1 & 2, with Desco Drainage

Project Details	
<b>Project lead(s)</b>	Trinity Watershed Management
<b>Project description</b>	Storm Drainage Project (CD13): - Culvert and channel improvements from Edgemere to Desco (Phase 1), from Desco to Joyce (Phase 2), and local drainage improvements to address local street flooding near 7108 Desco.  [NI Project Nos PB3228, PB3229 and PB1781/ Technical Project Evaluation Score of 44.0,44.0, and 53.0]
<b>Location</b>	Preston Hollow Channel from Edgemere to Joyce
<b>Estimate of probable cost and matching funds, if available</b>	\$1,859,000
<b>Project timeline</b>	Schedule may be adjusted depending on coordination with other adjacent projects:  Currently assigned to Storm Drainage Group C with the following schedule: Design: FY 18-19 Construction: FY 19-20
<b>Strengths</b>	Reduces local threat of local flooding due to limited channel and drainage system capacity; improves drainage serving Desco, Edgemere and Joyce and the properties in-between.
<b>Weaknesses</b>	Schedule may be dependent on coordination with other adjacent City Projects
<b>Opportunities</b>	Maybe possible to complete with other City projects to limit construction impacts, and reduce construction costs
<b>Threats</b>	Construction costs may escalate;
<b>Public meetings needed</b>	As requested; coordination with affected adjacent property owners will be conducted during design, concerning the easements, and prior to construction; traffic plan will be provided if necessary
<b>Media and public inquiries</b>	SRs: MCC
<b>Council actions to date? Future scheduled Council items?</b>	N/A Future Council Actions for design/construction contracts
